Attestation

On 8 July 2009 Eurofins Product Testing A/S received a sample with the product name :

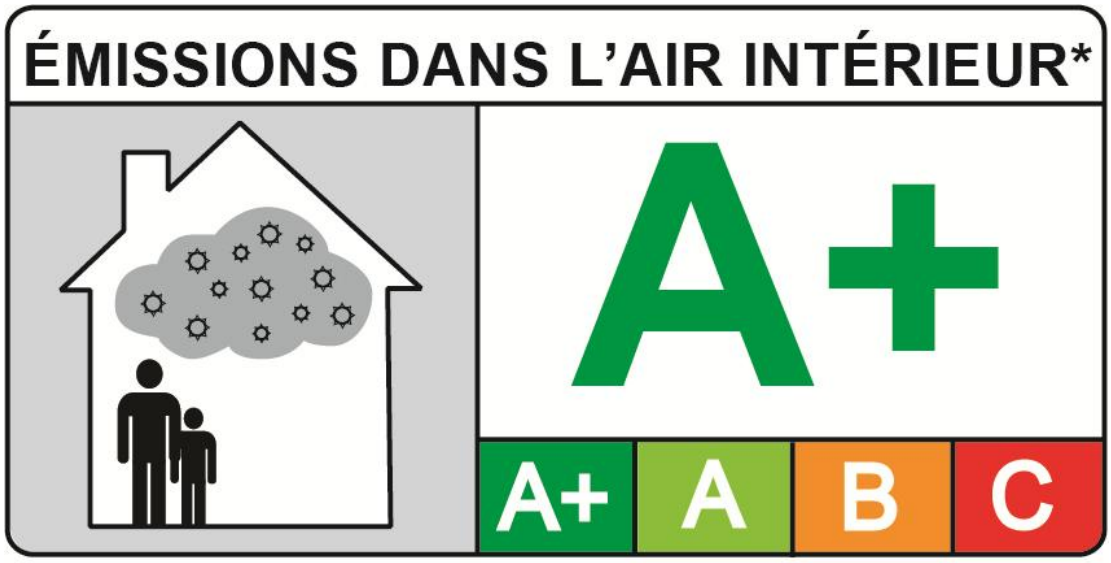

OWAcoustic

delivered by

Odenwald Faserplattenwerk GmbH

The product was tested for VOC emissions according to **the requirements of the French legislation (order of April 2011) concerning the labeling of construction products or coverings of walls or floors and paint and varnishes on their emissions of volatiles pollutants.**
Sampling, testing and evaluation were performed according to ISO 16000 in its latest versions, see test report no. 770418D.

In accordance with legislative requirements, the test results can be summarized as follows:

**Information sur le niveau d'émission de substances volatiles dans l'air intérieur, présentant un risque de toxicité par inhalation, sur une échelle de classe allant de A+ (très faibles émissions) à C (fortes émissions).*

The product was assigned a VOC emission class without taking into account the measurement uncertainty associated with the result. As specified in French Decree no. 2011-321 of March 23, 2011, correct assignment of the VOC emission class is the sole responsibility of the party responsible for distribution of the product in the French market.
